SUMMARY

Manufacturing Engineer with 10 years of experience in production, quality improvement, and process optimization. Skilled in root cause analysis, Lean manufacturing, and new product introduction. Experienced in cross-functional coordination and implementing solutions that improve efficiency and product quality. Trained in Japan for three years in advanced manufacturing environments.

WORK EXPERIENCE

Nov. 2025 - Present	Process Engineer - Enplas Semiconductor Peripherals Philippines Inc. - Support production operations, make work instructions and ensure processes meet customer and quality requirements. - Investigate line issues and implement corrective actions to prevent recurrence. - Coordinate with suppliers and internal teams for material planning and process support. - Prepare reports and maintain process and production documentation.
Apr. 2022 - Apr. 2025 (3 years)	Technical Intern - SMK Electronics (Toyama-Japan) - Achieved a 20% boost in productivity through detailed cycle time analysis and streamlining of bottleneck operations. - Reduced downtime by 15% by diagnosing recurring production issues, analyzing operational data, and addressing root causes. - Supported engineering, and maintenance staff in equipment assembly and process enhancement projects, gaining practical industry experience.
Sept. 2015 - Mar. 2022 (6 years. & 6 mos.)	Production Engineer II - SMK Electronics (Philippines) - Led 4 project teams in driving a 63% reduction in manufacturing defects through the application of Lean Manufacturing and Six Sigma methodologies. - Set and implemented product quality standards through detailed trials and evaluations, eliminating errors and saving \$15,000 annually. - Developed and conducted training sessions for production teams and new employees, improving efficiency, safety, and process compliance. - Applied troubleshooting and problem-solving skills to identify root causes of equipment and process failures, ensuring timely corrective measures.
Apr. 2015 - June 2015 (3 mos.)	Software Engineer Trainee - Accenture (Philippines) Learned the basics of C++, Python, MySQL, and Oracle's Peoplesoft software applications.

EDUCATION

Jun. 2009 - Apr. 2014	Holy Angel University (Tertiary) Angeles City Pampanga Bachelor of Science in Electronics Engineering
-----------------------	--

SKILLS / CERTIFICATIONS

- Technical Skills:** Six Sigma Methodologies, Lean Manufacturing, Root Cause Analysis (RCA), Kaizen, 5S, Documentation, Planning, and Quality Management.
- Soft Skills:** Leadership, Problem-Solving, Process Improvement, Teamwork, Data Analysis, Critical Thinking, Time Management, Adaptability, and Attention to Detail.
- Certifications:** Electronics Engineer (ECE) License, Electronics Technician (ECT), Cisco Certified Network Associate (CCNA).
